RE: Summary Report for Providing Site Security, Chemical Characterization and Labpacking, Removal and Re-packaging of Chemicals and Offsite Disposal of Cyanide Waste, Lane Plating Company Facility, 5322 Bonnie View Road, Dallas, Texas, TCEQ Work Order 2015-004

Dear Mr. Buck:

Pursuant to your request, SWS Environmental Services (SWSES) has prepared this summary of the work conducted by SWS following the recent field work completed at the Lane Plating Facility located at the above referenced address (See Figure 1.0). SWS personnel met with TCEQ representatives at the site on November 19, 2015 to develop a scope of work/workplan to 1)provide site security to prevent unauthorized access to the building, 2) provide haz-cat analysis and chemical characterization of chemicals in the onsite lab and to provide lab pack and repackaging of select chemicals and 3) remove chromic acid sludge from two sumps at the facility and secure the liquid chromic acid waste in poly totes delivered to the site. At the request of TCEQ, SWSES developed a cost estimate for the work, and prepared a Site Specific Health and Safety Plan prior to mobilizing to the site under TCEQ Work Order No. 2015-004.

#### Response Summary

On November 19, 2015 following the notice to proceed, SWSES personnel mobilized to the Lane Plating facility and met with TCEQ personnel from the Region 4 office and representatives from the Attorney Generals Office as well as the owner of the facility (Mr. Joe Lane). The purpose of the site inspection walk through was to evaluate the necessary measures to secure the building and to develop a plan to provide haz—cat analysis of unlabeled chemical containers in the onsite laboratory (See Figure 3.0, attached), and evaluate and prioritize which chemicals in the facility posed the highest risk for releases to the environment or to public health and safety. SWSES personnel included Mr. Damon Waresback - Project Manager, Mr. Gary Smith - Response Foreman and Ms. Cindy Bruce - Director of Waste Services. During the site walk, SWSES evaluated the requirements to secure the site from unauthorized access and the personnel and equipment necessary to identify and subsequently secure specific chemicals at the facility. A cost estimate for the work was submitted for review and subsequently SWES was directed to proceed with the workplan.

Emergency Response Remediation Field Services Waste Services 600 Grand Panama Blvd, Suite 200 Panama City Beach, FL 32407 Phone: 850.234.8428 Fax: 850.234.2451 www.swsenvironmental.com

#### **Site Security**

On November 20, 2015, SWES personnel mobilized to the site and began securing all the doors at the site (walk-through and garage style roll-up doors) by installing bolts and nuts through the guide tracks for the garage style roll-up doors and by welding dead bolts, hasps and padlocks for the walk through doors. All the outside opening doors were secured on this date. On November 23, 2015, SWES personnel returned to the site and began installing metal cattle panels over the first floor windows of the facility. The cattle panels were measured and cut to fit each window and the panels were secured by welding the panels to the metal window frames. The work for securing the site was completed on November 25, 2015.

#### Haz-Cat Analysis Lab - Pack and Removal/Repackaging of Chemicals

On December 1, 2015, SWES personnel mobilized to the site to stage poly totes for storing chromic acid waste to be removed from the two main sump areas located at the facility. The main sump is located beneath the chrome tank and around the chrome tank in the central part of the facility (See figures 3 & 4). On December 3, 2015, SWSES personnel mobilized to the site to initiate the removal of chromic acid from the two sumps and to conduct the haz-cat identification, lab-pack and over - packing of select chemicals at the site. A Site Entry/Exit Log with all personnel present at this debriefing/Health and Safety Meeting are included with the Site Specific Health and Safety Plan (See Attachment B of this report). Following the safety meeting, SWSES personnel began setting up the poly pump in secondary containment to begin removing the chromic acid liquid from the main large sump area in the central part of the building (see Figure 3.0 and 4.0 attached). The waste was pumped into 300 gallon totes staged adjacent to the sump/chrome tank and at the east loading dock (See site photographs, Attachment A). While the SWSES crew worked at removing the chromic acid liquids, a SWSES chemist began the haz - cat identification of the chemical containers in the lab. Four containers of cyanide materials were identified in the lab including silver cyanide, copper cyanide, sodium cyanide and potassium cyanide. These containers were subsequently lab - packed in 5 gallon buckets and secured and labeled for chemical profiling and off-site disposal (see discussion below). All of the chemical contents in the containers in the lab were identified and labeled for future disposal proceedings. In addition to the lab chemicals, two small drums containing potassium cyanide and sodium cyanide were overpacked in DOT-approved, open-head 55 gallon drums, labeled and secured in a lockable flammables cabinet for subsequent profiling and disposal. The removal of the chromic acid from the main sump and the sump beneath the tank labeled Tank 5 on Figure 3.0 and 4.0 was continued and was completed on December 7, 2016.

Emergency Response Remediation Field Services Waste Services 600 Grand Panama Blvd, Suite 200 Panama City Beach, FL 32407 Phone: 850.234.8428 Fax: 850.234.2451 www.swsenvironmental.com

#### Waste Management

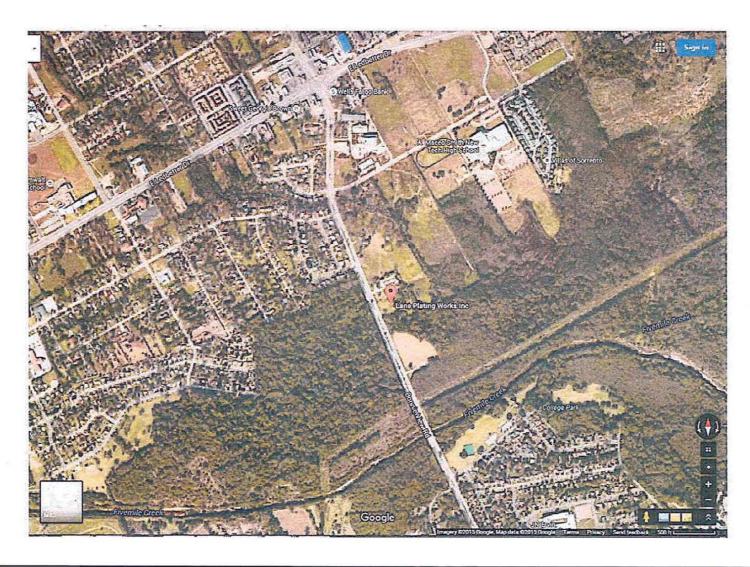

The four containers of cyanide materials lab - packed from the onsite lab were secured along with the two 55 gallon overpacks in the lockable cabinet to await further profiling and disposal proceedings. On December 10, 2015, SWSES personnel met with the facility owner at the site to obtain signatures on the land disposal restriction (LDR) forms, waste profiles and waste manifests. The six (6) containers were profiled and approved for disposal at the Chemical Reclamation Services Facility in Avalon, Texas. On December 18, 2015 SWS transported the six containers of cyanide for disposal at the Chemical Reclamation Services Facility (land disposal restriction (LDR) forms, waste profiles and waste manifests are included in Attachment C of this report).

Should you have any questions regarding this report, please do not hesitate to call me at 817-847-1333.

Sincerely,

Damon Waresback, P.G. Remedial Services Manager SWS Environmental Services

#### SWS

#### Health and Safety/ Site Security Plan

**Emergency Response for: Lane Plating Works Cleanup** 

Job Information	Date: 12/03/2015 Job Number: FW1-511-1482	
Client:	TCEQ	
Contact:	Anthony Buck	
Phone/Pager Numbers:	(512) 563-3935	
Location:	5322 Bonnie View Rd, Dallas, TX	

Product Involved:	Chromic Acid, Sodium Cyanio	de, Potassium Cyanide, Unknowns
Site Activities: Site	cleanup, specifically pumping	chromic acid into totes, over packing two (2)
cyanide drums, and	packing three (3) unknowns to	prepare for sampling and disposal.
Anticipated Durati	on: 1 Day	
SWS Chain of Con		~. A A
Desired Manager	Print Damon Waresback	Signafure Marchae
Project Manager: Supervisor:	Taboo Washington	14 worth by week
Safety Specialist:	Ashley Gill	Davis Davis
Decon Supervisor:	Taboo Washington	artik whenter
Decon Supervisor.	Slude Hinrichs	Stude at
	Coso Wilson	
(Use attachment	Joel Kins	Jul 5
if necessary)	Gran R. Sansta	Se Marth

All personnel have received the appropriate safety training in accordance with 29 CFR 1910.120 section Q and are currently under medical surveillance in accordance with 29 CFR 1910.120 section (f).

**Tailgate Safety Meeting** 

By signing the above chain of command, I acknowledge that, I have been instructed in the information that will be covered in the Tailgate safety meeting with all personnel that will be involved with the site sampling activities. The Project Manager (Damon Waresback) will conduct the Tailgate Meeting and cover the topics outlined in this Health and Safety Plan and the work order/work plan. Ashley Gill will keep all Agency, HUB's, all outside Organization, and SWS apprised as to ongoing updates and changes to the Health and Safety plan when they come about.

Outside Organizations:

Name	Agency/Company	Phone Number	Pager Number

Site	Security	and	Control
DILL	Decuire	anu	COME

Site Security and control of the Exclusion Zone will be the responsibility of the SWS Onsite Foreman/Supervisor: Taboo Washington.

No unauthorized persons will be permitted within this area. All activities and arriving/departing personnel will coordinate with the site Supervisor. Initially the entire site will be considered the Exclusion Zone. Upon completion of air monitoring and chemical identification, a support zone and contamination reduction zone will be designated.

#### Decontamination

All materials leaving the exclusion zone will be thoroughly decontaminated using a Hudson sprayer for decontamination. An eye wash station will be set up at the outfall. The PPE will be collected and drummed for later disposal.

#### Personal Protective Equipment will consist of the following items:

Task: Site Cleanup

Protective Suit	Glove(s)	Respiratory Protection	Standard Equipment
Tychem SL	Nitrile Gloves	Full Face Respirator	
	-,	w/ Organic-Acid	
		Cartridge/MultiGas	

#### Task: Decontamination

Protective Suit	Glove(s)	Respiratory Protection	Standard Equipment
	Nitrile Gloves		Eyewash Station
			Hudson Sprayer

The failure to use mandatory PPE will result in the immediate removal from job site and a write up in your employee file.

#### Monitoring Equipment to be used:

5-Gas Monitor

#### **Emergency Alerting:**

In addition to visual and verbal communication, air-horn signaling will be utilized as follows:

Air-horn Signaling	Meaning
One Long Blast	Break
Two Short Blasts	In Need of Supervisor
Multiple Short Blasts	Emergency Evacuation
Visual Signaling	Meaning
Hands on top of Head	Need assistance
Hands on Chest	Respiratory Problems
Hands Pointing to Side of Head	Return to Decon for Consultation
Thumbs Up	O.K., I'm all right, I understand
Thumbs Down	No, Negative

Site Safety Concerns: Check appropriate site specific concerns:

#### Weather concerns:

Temperature	Winds	Conditions	
Cool	Light	Wet & Rainy	

Acid Concerns: All employees must wear appropriate PPE while on the job site. Several concerns could be encountered when sampling acid or acid impacted media including acid splashing and inhalation hazards. Minimum requirements will be Level D. Acid sampling will require Level C which will include splash resistant coated Tyvek, respirator with acid cartridges, nitrile gloves and chemical boots.

Environmental Concerns: Several biological concerns are often encountered while in the field. Arachnid, insect, mammal and reptile injuries (bites and stings) can all become medical problems while in the field.

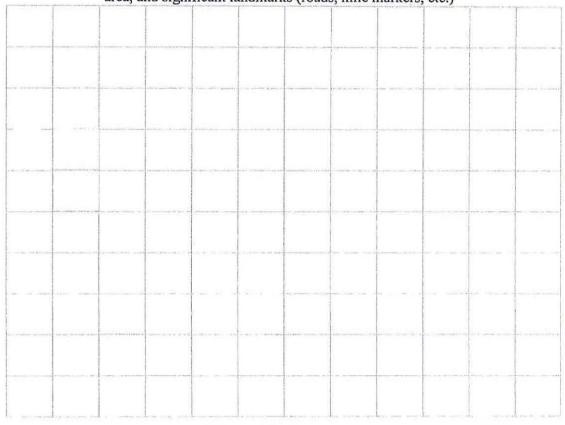

**Medical Emergency:** The following procedure is to be followed in the event of a medical Emergency. Employees will be provided medical attention at no personal cost.

Hospital: Baylor University Medical Center at Dallas Hospital Address: 3500 Gaston Ave, Dallas, TX 75246

Immediately contact the Site Safety Specialist Ashley Gill about Injuries and Illnesses reported. Please have injured prepare a statement and the Supervisor will complete an Incident Analysis Report within 8 hours. These documents must be turned in the following day. Report Near Miss Incidents to Safety Specialist for analysis and correction.

Emergency Meeting Point: Identify an emergency meeting location and/or a facility emergency evacuation plan and meeting point prior to commencement.

<u>Site Map:</u> (please include wind direction, CRZ, exclusion zone, support zone, decon area, and significant landmarks (roads, mile markers, etc.)

2) General Work	<ul> <li>Chemical Exposures</li> <li>Eye Injuries</li> <li>Lacerations/Punctures</li> <li>Fire</li> </ul>	<ul> <li>Wear ANSI approved Safety Glasses, Face Shields, or Goggles.</li> <li>Beware of jagged and damaged structures. Wear proper PPE.</li> <li>Be aware of nearest fire extinguisher location. Practice good housekeeping procedures.</li> </ul>
3) Chemical Cleanup - Acid - Cyanide - Unknowns	- Chemical Splash - Inhalation	<ul> <li>Wear appropriate Level C PPE which will include Tychem SL sealed seam CPC, full face APR with Multi-gas Cartridge, nitrile gloves and chemical boots. All seams will be taped with chemical tape.</li> <li>Ensure decontamination station is setup prior to starting work</li> <li>Beware of jagged and damaged structures.</li> </ul>

#### **SECTION (4) CERTIFICATION:**

"I hereby certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing, or through knowledge of the waste to support this certification. I certify that as an authorized representative of the generator named previously, all the information submitted in this certification and all attached pages is true and correct to the best of my knowledge. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine or Imprisonment.

Authorized Representative Signature	Man
Print or Type Name	Lane
Date 12-10 -2215	

Wastewater concentration in mg/l, Non-wastewater concentration in mg/kg measured through total waste analysis unless otherwise noted.

These constituents are not "underlying hazardous constituents" in characteristic wastes, according to the definition at 268.2(i).

<sup>\*</sup> These concentrations measured through TCLP analysis and are expressed in mg/l.

#### **SECTION (4) CERTIFICATION:**

"I hereby certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing, or through knowledge of the waste to support this certification. I certify that as an authorized representative of the generator named previously, all the information submitted in this certification and all attached pages is true and correct to the best of my knowledge. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine or imprisorment.

Authorized Representative Signature _	Ch / Mrs
Print or Type Name <u>Zo e</u>	Lane
77-17-7215	

Wastewater concentration in mg/l, Non-wastewater concentration in mg/kg measured through total waste analysis unless otherwise noted.

These constituents are not "underlying hazardous constituents" in characteristic wastes, according to the definition at 268.2(i).

<sup>\*</sup> These concentrations measured through TCLP analysis and are expressed in mg/l.
